EDUCATION HISTORY

Bachelor

Namangan Institute of Engineering Technology - 2022

- Engineer technologist

WORK EXPERIENCE

Web Developer

Although I am a recent graduate of the Najot Ta'lim Backend Node.js Standard Course, I have gained substantial hands-on experience by working on real-world projects during my studies. Throughout the 8-month course, I worked on various projects that allowed me to apply and strengthen my skills in backend development, including. Additionally, I have completed several personal projects, where I applied my backend skills to create functional and user-friendly systems. These projects have helped me gain a deeper understanding of backend architecture, debugging, and optimizing server performance.

I am eager to leverage my knowledge and enthusiasm to contribute to impactful and innovative projects in a professional setting.

CERTIFICATES

Engineer texnologist

Bachelor of Technology - 2022

Web developer

February 2024 - October 2024
